DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art searched and cited failed to teach or fairly suggest a method of nano-manipulation, having steps of positioning a probe of a scanning probe microscope proximate at least one nano-scale object and moving the probe across the substrate along a gyrating path proximate at least one nano-scale object to reposition at least one nano-scale object in combination with the remaining elements of claims 1 and 14. Claims 2-13 and 15-19 are allowable because of their dependencies upon claims 1 or 14. The prior art searched and cited also failed to teach or fairly suggest a nano-manipulation system, having means for positioning a probe of a scanning probe microscope proximate the nano-scale object and means for moving the probe relative to the substrate along a gyrating path proximate the nano-scale object to reposition the nano-scale object in combination with the remaining elements of claim 20.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should

preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patents; 6,479,892 (Hopson et al), 5,365,073 (White), 5,763,933 (White), 6,608,307 (Baur), 5,992,226 (Green et al), and 6,611,178 (Kawakatsu et al). All of the cited US patents contain art similar to that being claimed by applicant, more specifically, apparatuses and methods for nano scale measuring.
